

STEPHEN (SALIM) OTIENO

Data Science & Analytics Professional

Nairobi, Kenya | +254 708 055 990 | otienostephen991@gmail.com

Portfolio: salimstephen.vercel.app

GitHub: github.com/salimstephen | LinkedIn: linkedin.com/in/otieno-stephen

PROFESSIONAL SUMMARY

Data Science & Analytics professional with hands-on experience applying data analysis, visualization, and machine learning techniques through practical projects using Python, SQL, Excel, Power BI, and Scikit-learn. Completed professional training in Data Science, Data Analytics, Machine Learning, Python, and AI through ALX Africa, supported by additional training in data fundamentals through IBM SkillsBuild.

Experienced in exploring and preparing datasets, extracting insights, building analytical solutions, and communicating findings through practical projects. Currently strengthening my technical and professional skills while building a portfolio focused on solving real-world problems with data. I bring a strong willingness to learn, analytical thinking, and a practical approach to working with technology and data.

TECHNICAL SKILLS

Programming & Data Analysis:

Python, SQL, Pandas, NumPy

Data Science & Machine Learning:

Scikit-learn, Machine Learning Fundamentals, Feature Engineering, Recommendation Systems

Data Visualization & Business Intelligence:

Power BI, Power Query, DAX, Microsoft Excel, Matplotlib

Databases & SQL:

MySQL, Relational Data Analysis, Joins, CTEs, Window Functions, SQL Views

Tools & Development:

Git, GitHub, Jupyter Notebook, VS Code

CORE COMPETENCIES

Data Cleaning & Preparation • Exploratory Data Analysis • SQL Data Analysis • Excel-Based Data Analysis & Reporting
Data Visualization & Dashboarding • Business Intelligence • Machine Learning Fundamentals • Recommendation Systems

Analytical Problem Solving • Data-Driven Decision Support • Communication & Customer Service • Organization & Time Management • Continuous Learning

PROFESSIONAL EXPERIENCE

Independent Delivery Rider | Self-Employed

Nairobi, Kenya | **2021 – Present**

- Manage daily customer deliveries across Nairobi while maintaining reliable service and professional communication.
- Plan routes, prioritize multiple tasks, and adapt to changing schedules and operational conditions.
- Resolve customer and logistical challenges independently while maintaining a professional approach.
- Manage daily operations independently, demonstrating organization, time management, accountability, and problem-solving skills.
- Balanced ongoing work responsibilities with professional development, completing training and building practical projects in Data Science, Data Analytics, Python, and Machine Learning.

SELECTED PROJECTS

Movie Recommendation System

Python | Pandas | NumPy | Scikit-learn | Cosine Similarity | Jupyter Notebook | Git | GitHub

GitHub: github.com/salimstephen/movie-recommendation-project

- Built a movie recommendation system using the MovieLens dataset, exploring popularity-based and user-based collaborative filtering approaches.
- Performed data exploration and preparation across movie ratings, metadata, and user-movie interactions.

- Created a user–movie matrix and applied cosine similarity to identify users with similar movie preferences.
- Developed a recommendation workflow that filters already-watched movies and ranks candidate recommendations based on ratings.
- Applied data manipulation, feature engineering, similarity analysis, and recommendation-system concepts using Python and Scikit-learn.

Maji Ndogo Water Access & Infrastructure Analysis

SQL | MySQL | Jupyter Notebook | Python | Data Analysis

GitHub: github.com/salimstephen/maji-ndogo-water-analysis

- Analyzed a relational water-services dataset to investigate water access, service conditions, queue times, audit information, and infrastructure needs.
- Cleaned and standardized data across employee, location, visit, water-source, and water-quality tables.
- Applied multi-table joins, aggregations, CTEs, SQL views, and window functions including RANK(), DENSE_RANK(), and ROW_NUMBER().
- Analyzed water access across provinces and towns, including the number and share of people served by different water-source types.
- Developed condition-based logic to organize potential infrastructure interventions using queue-time, broken-tap, and water-quality conditions.

FUTURE_DS_01 — Business Sales Dashboard

Power BI | Power Query | DAX | Excel/CSV | Data Analysis

GitHub: github.com/salimstephen/FUTURE_DS_01

- Built an interactive Power BI dashboard to analyze e-commerce sales performance and support business decision-making.
- Used Power Query to prepare and clean sales data and developed DAX measures for key sales and revenue metrics.
- Analyzed product, category, regional, and time-based sales patterns to identify areas of stronger and weaker performance.
- Communicated findings through dashboard visualizations and documented business recommendations related to marketing, inventory planning, and regional growth.

CERTIFICATIONS

Data Science Professional Certificate — ALX Africa | 2026 — Python • Data Analysis • Machine Learning

Machine Learning Certificate — ALX Africa | 2026 — Machine Learning • Python • Predictive Modeling

IBM Data Fundamentals — IBM SkillsBuild | 2026 — Data Fundamentals • Analytics • Data Concepts

Data Analytics Certificate — ALX Africa | 2025 — Data Analysis • Excel • SQL

Python Certificate — ALX Africa | 2026 — Python • Programming

AI Career Essentials (AiCE) — ALX Africa | 2025 — Artificial Intelligence • Digital Skills

Professional Foundations — ALX Africa | 2025 — Leadership • Communication • Professional Skills

AI Starter Kit — ALX Africa | 2025 — Artificial Intelligence • AI Fundamentals

EDUCATION

Jomo Kenyatta University of Agriculture and Technology (JKUAT)

Bachelor of Science in Information Technology — Studies Completed Without Degree | 2021

Completed foundational coursework in Information Technology before discontinuing studies due to financial constraints. Continued professional development through industry-recognized technical training and practical projects in Data Science, Data Analytics, Python, and Machine Learning
